airways**

secMAC

We proudly introduce the secMAC video laryngoscope that will revolutionize the field of video laryngoscopy. The secMAC boasts large **horizontal and fully adjustable high resolution screen** that can be tilted back and forth, and also be rotated to cover all intubation and viewing angles. The **built-in rechargeable battery** offers a staggering **180 minutes** effective operating time and has a battery time indicator visible on-screen. Get the **Secma Power Bank** and you will instantly have a minimum of **another 180 minutes** of operating time. The secMAC is built around a very sturdy metal frame, making it **extremely durable** and a dual light source ensures **perfect visibility** during the procedure. Uniquely, the secMAC also provides the opportunity for **recording photos and video clips** for both documentation and educational purposes. The secMAC can of course also be used for direct laryngoscopy, should the need arise.

The secMAC provides easy, quick and safe intubation in both clinical and trauma situations with a **wide selection of sterile disposable blades** to cover every possible intubation scenario. It **weighs just 200 gr.** and it will easily fit in the pocket of both the clinician, the trauma doctor or ICU personnel. **Always ready - always at hand.**
